

IMDEA Networks Communications Report

Media Impact – Year 2019

Introduction

This dossier covers the annual communication and media dissemination activities performed by the Operations department at IMDEA Networks. IMDEA Networks strives to have an impact on the media as it constitutes an optimal channel for our scientific work to reach the general public. We believe that science should be useful to society and help resolve its more pressing issues. Thus, our goal is to go beyond the scientific community and communicate and interact with those who are the ultimate beneficiaries of our scientific results.
